

2. Select [Bluetooth] and then tap **OK** to confirm.

3. Select [Security] and then tap **OK** to confirm.

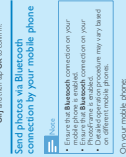

4. Select [Pin Code] and then tap **OK** to confirm.

8. To set the pin code on, select [Pin Code On] and then tap **OK** to confirm.

To set the pin code off, select [Pin Code Off] and then tap **OK** to confirm.

Send photos via Bluetooth connection by your mobile phone

- Ensure that **Bluetooth** connection on your mobile phone is enabled.
 - Ensure that **Bluetooth** connection on your PhotoFrame is enabled.
 - Make sure you have a **very** good connection between your mobile phone and your PhotoFrame.
- On your mobile phone:
1. Select photos to be sent to the PhotoFrame.
 2. Select [Send] > [Bluetooth], and then confirm the selection.
 3. Your Philips PhotoFrame is searched.
 4. If a pin code is required, enter the pin code (0000 by default) of the PhotoFrame.
 5. Select [Send], and then confirm the selection.
 6. Selected photos are sent to and saved in the **Bluetooth** album on the PhotoFrame.

Frequently asked questions

Is the LCD screen touch-enabled?
The LCD screen is not touch-enabled. After you turn on the PhotoFrame, you can use the touch boarder on the front panel to control the PhotoFrame.

Can I use the PhotoFrame to delete photos on a memory card?
Yes, it supports operators to delete photos on external devices such as a memory card. Ensure that you enable the delete function on a memory card available on the PhotoFrame.

Why does not my PhotoFrame show some of my photos?
The PhotoFrame plays only JPEG photos, and you can only delete photos in the progressive JPEG areas (maximum: 1024 x 768 pixel resolution).

• Ensure that these photos are not damaged.

Why does my PhotoFrame not show some of my video files?
The PhotoFrame plays most video clips of a digital still camera in MJPEG (*.avi*.mov), MPEG 1 (*.mpg), MPEG 4 (*.wmv*.mov*.mp4), and H.264 (*.h264*.mp4). Some video clips might be incompatible with the PhotoFrame on your PhotoFrame. Before playing, ensure that these video clips are compatible with your PhotoFrame.

• Ensure that the size of the video files are applicable to your PhotoFrame (for details, see the manual in the User Manual).

• Ensure that the resolution is not too small.

Why cannot my PhotoFrame show video files even I could see them in [Browse] mode, and I played them before?
Ensure that [SlideShow Photo Only] is not enabled.

To play video in slide show mode:

1. In slide show mode, tap **■**.
2. In the displayed option menu, select [SlideShow Photo Only].

- To remove a storage device, pull it out from the PhotoFrame.

3 Setup

Set up Bluetooth connection

With your PhotoFrame, you can set up Bluetooth connection with a device like a mobile phone. Once a device is recognized, it is automatically accepted when it tries to connect with the PhotoFrame.

- In the home screen, select **[Settings]** and then tap **OK** to confirm.

- Select **[Bluetooth]**, and then tap **OK** to confirm.

- To set off Bluetooth connection, select **[Bluetooth Off]** and then tap **OK** to confirm.

If Bluetooth connection on your PhotoFrame is enabled, the Bluetooth icon is displayed on the home screen.

- Photos obtained via Bluetooth connection are saved in the **Bluetooth** album. You can access or manage the Bluetooth album the same way you access or manage other albums on the PhotoFrame.

Set Bluetooth pin code

To keep security you can set a pin code (from 1 to 16 digits) on the PhotoFrame. The default pin code is 0000.

- In the home screen, select **[Settings]** and then tap **OK** to confirm.

- Select **[Bluetooth]**, and then tap **OK** to confirm.

- Select a collage format, and then tap **OK** to confirm.
- To view collage display, select **[Settings]** > **[SlideShow]** > **[Collage]** > **[Slide]** and then tap **OK** to confirm.

List-Group">

- Select **[Setup]**, and then tap **OK** to confirm.
- Select **[Bluetooth On]**, and then tap **OK** to confirm.

- To play a single music file, tap **▶** to access the folder, select a music file, and then tap **OK** to confirm.

If you have set music before

List-Group">

- In **[Play Background Music]** menu, select **[Turn On]** and then tap **OK** to confirm.
- Select music files are played.
- In **[Play Background Music]** menu, select **[Turn Off]** and then tap **OK** to confirm.

Display collage photos

List-Group">

- In the home screen, select **[Settings]** and then tap **OK** to confirm.
