2. 2.5ft Cord

ES Características

1. Interruptor de encendido y apagado con disyuntor de 15 amp
2. Cable de 76 cm

Think Green, Save Energy

Flip this surge protector to OFF and completely stop all stand-by power to your equipment.* It's good for your pocket and for the planet!

*Note turning the power completely off will erase memory of recordable devices such as TiVO, DVR, DVD, requiring re-programming when power is turned on. If this is undesirable for the application, please consider other methods of energy savings.

Choosing the right protection

Home Theater	Home Office	Home Electronics	ShopLogic
960-6500 joule rating	960-5500 joule rating	150-1500 joule rating	300-2500 joule rating
