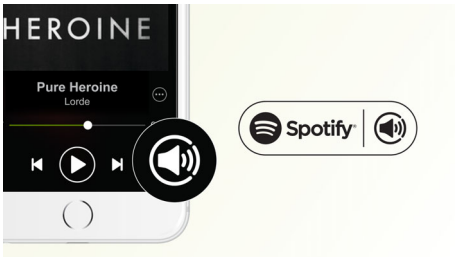
- Flip from room (speaker A) to room (speaker B)
- Press 'Play' for 'Music Follows Me'

Powerful room-filling sound
- Powerful room-filling sound with 4 audiophile-grade drivers

PHILIPS

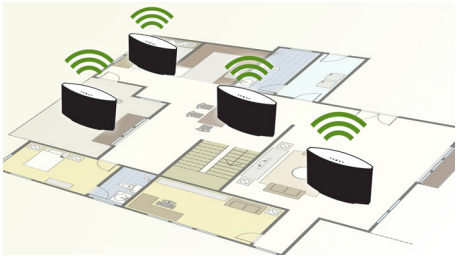
Highlights

Spotify as a remote



Using Spotify Connect you can easily browse, explore, and play music from any room in the house using your smart device as a remote. With a direct Spotify connection, you can play music straight from the cloud so your smart device can be used for calls, videos or even go out of range without interrupting your music. This is also more battery friendly, since energy used for music is minimized. All the same great Spotify features are there, from its ready-made lists to its high sampling rates. Everything you need to discover new music and hear it at its best.

Multiroom speakers

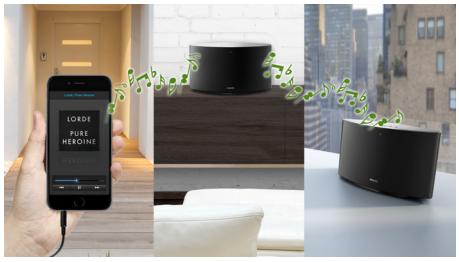


Multiroom speakers let you play songs in one room, or in many at the same time, so your music can either follow you around the house or stay where you want it. Each person can play to any selected speaker, and when additional speakers are purchased they can be added to the system wirelessly and easily.

'Play' for the last heard song

Listen to your favorite tunes almost without interruption. Just hit 'Play' on the speaker to start playing the last song you heard on Spotify, without even unlocking your smart device.

'Play' for 'Music Follows Me'



When you press 'Play', music starts instantly on the speaker, no matter if it was last played on a smart phone, tablet or other smart device. This feature also lets you flip from one speaker to another in different rooms.

Direct access without app

Handy control buttons (Play / Pause, Volume Up / Down, Previous / Next) give you access to the controls you need, without fiddling with an app. Once an album, playlist or station has been selected, skipping tracks, repeating, or pausing the music is a button press away.

Four audiophile-grade drivers

Equipped with 4 audiophile-grade drivers, this speaker creates powerful room-filling sound while its two bass ports expand low frequency bass, creating a truly immersive and dynamic sound. Enjoy powerful sound in a compact size.

Philips companion app

Philips SpeakerSet Multiroom Manager app helps you set-up and manage your Philips Spotify Multiroom speakers effortlessly. Simply connect your new Philips Spotify Multiroom Speaker to your home wireless network. If you have more than one speaker, use the app to group the speakers for Multiroom flexibility.
