Highlights

Noise Canceling Pro

Focus on the sounds you want to hear. Hybrid noise cancellation uses multiple mics and advanced audio processing to filter out external noise. You can activate Awareness Mode by touching an earbud, and you can control wind-noise reduction via the Philips Headphones app.

Detailed sound. Rich bass

Whether it's a song or a podcast—perfectly tuned 13 mm drivers deliver rich bass and thrilling clarity. The sound pauses if you take an earbud out, and the best codec for your iOS or Android device is selected automatically. You'll enjoy superb sound whichever streaming service you use.

Refined design

The circular design of these earbuds is a real head-turner, and you can choose a dark or light colorway to go with your look. Six sizes of silicone ear-tip covers and an extra pair of comply foam help ensure a secure, comfortable fit.

Bluetooth multipoint

Streamline your working day. These true wireless earbuds can connect to two Bluetooth devices at the same time—and switch between them as you need. So you can take calls from your laptop and listen to music on your phone.

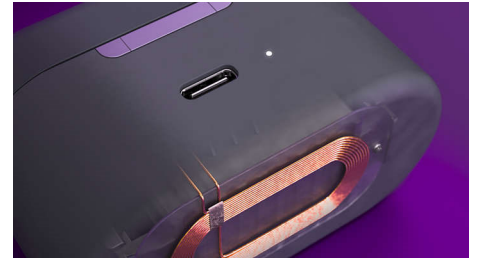

Crystal-clear calls

Multiple mics and a dedicated algorithm focus on the sound of your voice as well as reducing noise from the world around you. Even wind noise is

filtered out, so you can be heard clearly when on a call outside.

35 hours play time with case

With these earbuds fully charged—and a fully charged case—you can travel with more than a day of play time in your pocket. Plus the music pauses if you take an earbud out, so you never need to miss a beat. The Qi-compatible case can be charged wirelessly or via USB-C.

Philips Headphones app

The Philips Headphones app lets you adjust the level of noise cancellation by switching between preset modes, and you can use the app to activate wind-noise cancellation. An equalizer lets you fine-tune your sounds to fit your mood.

Fast pairing. Touch controls

Touch controls keep things simple, and Google Fast Pair lets you pair to a compatible Android device with a single tap. When the headphones are placed near your Android device, you are automatically asked if you want to connect.
