## Getting to Know Your Pronto Control Panel

Your **TSU9600 Control Panel** is designed and manufactured with great care to offer you reliable and easy operation of your home theatre system. It has been pre-programmed by your installer and contains what is known as a configuration file that contains all the codes, graphical buttons and navigation behaviour.

# Taking a First Look

## Control Panel

## Docking station

## Charging the Control Panel

When the Battery level icon  on your screen turns red, it is time to charge the Control Panel. The Control Panel will operate from one to several days depending on how your installer has configured it.

**Note** *The service life of the battery depends on the timeout settings and wireless network settings configured by your installer. Please contact your installer if you notice that the battery is deteriorating.*

When you place the Control Panel in the docking station, the red Charging LED on the front of the docking station lights up.

When the Charging LED fades out, it means that the Control Panel is fully charged. This can take 3 to 4 hours.

If the battery is low and the Charging LED does not light up, make sure that:

- the power switch at the bottom of the Control Panel is switched to 1.
- the docking station is plugged into the mains. The docking station glows when it is plugged in.
- the Control Panel is located properly in the docking station.
- the panel connector is clean and free of obstructions.

**Tip** *It is recommended that the Control Panel be placed in the docking station after use. The Control Panel still consumes power even while its screen has turned black.*

**Note** The screen is calibrated in the factory. Do not use this function unless you experience problems with the touch screen.

## Support

### Maintaining the Control Panel

#### Take care not to damage the touch screen

- Do not drop the Control Panel or subject it to heavy impact.
- Use the stylus included or your finger to tap the touch screen.

**Attention** In order to avoid scratching the touch screen, never use an actual pen, pencil or other sharp object on it.

#### Protect the Control Panel from extremes of temperature

Keep the Control Panel away from heaters and other heat sources.

#### The Control Panel is not waterproof

The Control Panel must not be exposed to rain or moisture.

Do not store or use the Control Panel in any location that is extremely damp or wet.

If you have spilt water on the Control Panel, you must turn it off by switching the Power switch to 0.

Place the Control Panel in a clean environment to dry.

**Cleaning the Control Panel**

- Use a soft, damp cloth to clean the Control Panel.
- If the touch screen is dirty, clean it with a soft cloth moistened with a diluted window-cleaning solution.
- Do not use harsh detergent or an abrasive sponge.
- Avoid using excess water.

**Troubleshooting**

**The buttons on the touch screen of my Control Panel do not work properly**

If you find that tapping a button activates one of the adjacent buttons, or if you have to tap next to a button to activate it, it is recommended that you recalibrate the touch screen as described in 'Changing the Pronto Settings' on page 8.

Calibrating is a way of adjusting the touch screen to regain accuracy and reliability.

**The Control Panel goes to standby mode automatically**

This is a timeout feature of the Control Panel to save power. You can adjust the time that the Control Panel stays active in the Settings pages on the tab Screen, as described in 'Changing the Pronto Settings' on page 8.

**My AV equipment does not respond to commands from the Control Panel**

- Check the status of the battery on screen. If the Battery level icon is red, recharge the Control Panel.
- When your Control Panel is operating in a WiFi environment, bear in mind that it may take the network a few seconds to wake up and start transmitting codes.
- You may be out of reach of the WiFi network. If so, the WiFi activity icon that normally indicates WiFi strength changes to . Please refer to the next chapter.

**WiFi activity icon shows no WiFi strength**

---

**Note** *The WiFi activity icon may not be visible on screen, depending on the settings made by your installer.*

---

If the Control Panel shows one of the following icons:

	<p><b>No connection</b></p> <ul style="list-style-type: none"> <li>• The Wireless Access Point is powered down</li> <li>• The Control Panel is out of range of the Wireless Access point</li> <li>• There is an encryption problem</li> </ul>
	<p><b>No identification</b></p> <ul style="list-style-type: none"> <li>• An IP problem has occurred. If the problem comes up regularly, contact your installer to change the settings.</li> </ul>

**My Control Panel rapidly runs out of power**

- Bear in mind that the Control Panel is still using power when operating in a WiFi environment, even while its screen is black. It is recommended that the Control Panel be placed in its docking station each time after use.
- If the battery runs out of power constantly, it may be due for replacement. Contact your installer for more information.

## FCC Compliancy

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rule.

These limits are designed to provide reasonable protection against harmful interference in residential installations. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If the equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a different circuit from the receiver.
- Consult the dealer or an experienced radio/TV technician for help.

---

**CAUTION** *The user changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.*

**Verwijdering van uw oude product**

Uw product is vervaardigd van kwalitatief hoogwaardige materialen en onderdelen, welke gerecycled en opnieuw gebruikt kunnen worden. Als u op uw product een doorstreepte afvalcontainer op vieltjes ziet, betekent dit dat het product valt onder de EU-richtlijn 2002/96/EC. Win inlichtingen in over de manier waarop elektrische en elektronische producten in uw regio gescheiden worden ingezameld. Neem bij de verwijdering van oude producten de lokale wetgeving in acht en plaats deze producten niet bij het gewone huishoudelijke afval. Als u oude producten correct verwijderd voorkomt u negatieve gevolgen voor het milieu en de volksgezondheid.
