Bluetooth Headset

VOX120

Enjoy wireless handsfree talking!

12 hours talk time

Drive and talk legally and safely. Move freely without the hassle of cables. Stop searching in which pocket you put that ringing phone. Talk freely for half a day without charging. Enjoy the simplicity of the Vox 120.

Talk freely - handsfree and wireless

- Wireless call management
- Bluetooth enabled wireless handsfree talking

Talk longer, charge less

- 12 hours talk time

Works with your Bluetooth enabled phone

- Bluetooth HSP/HFP compliant

PHILIPS

Technical specifications

Connectivity

- **Bluetooth profiles:** Handsfree, Headset
- **Bluetooth version:** 1.2
- **Maximum range:** Up to 33 feet m

Convenience

- Volume control

Accessories

- **Charger:** Charger included
- **IFU / User Manual:** Canadian French, English, Mexican Spanish
- Warranty Card

Power

- **Battery Type:** NiMH
- Rechargeable
- **Standby time:** Up to 200 hours
- **Talk time:** Up to 12 hours

Packaging Data

- **EAN/UPC/GTIN:** UPC 026616 02821 4

Dimensions

- **Product weight (g):** 26

Product highlights

Wireless call management

Manage your call without using your mobile phone. This includes call acceptance, rejection, voice dial and redial. Voice dial and redial have to be supported by your mobile phone.

Wireless handsfree talking

Using your cellphone without a headset can be inconvenient and unsafe. In many locations it is also illegal while driving. Wired handsfree kits add the hassle of a cable. A Bluetooth headset replaces the cable with a short range wireless Bluetooth connection, so your hands are free and your freedom to move is not hampered by a cable. Because the transmitted energy close to your head is much lower than that radiated from your mobile phone Bluetooth also decreases potential risks associated with cellphone radiation.

12 hours talk time

An extra large, rechargeable battery provides an extra-long 12 hours of talk time. Longer talk times decrease the risk of your calls being cut short because of low batteries. Actual talk times may vary depending on usage situations.

Bluetooth HSP/HFP compliant

Bluetooth is a cable replacement technology. Since Bluetooth is a global standard, Bluetooth devices of different manufacturers can interoperate using shared profiles. HSP (Handset Profile) and HFP (Handsfree Profile) Bluetooth Profile are the profiles required for typical Bluetooth Headset operations, such as accepting and ending a call, redialing, voice dialing etc. If your mobile phone is compliant to the HSP or HFP (like virtually any Bluetooth enabled Phone) this headset will work with it.
