

## Video Cassette Player (Play Only)

- **AC/DC operation**
- **Digital auto tracking system**
- **Auto head cleaner**
- **Repeat play-indefinite!**
- **Rapid start mechanism**

#### Full Auto-Feature Package

- Power on
- Digital auto tracking system
- Auto play
- Auto repeat
- Auto rewind
- Auto eject
- Auto power off

Multifunction Remote

Let's make things better.

PHILIPS

# Video Cassette Player (Play Only)

## Playback Features

### Digital Auto Tracking System

When tape playback begins, this feature automatically seeks the optimum tracking position in the tracking range, and the optimum audio signal tracking position for clearest picture and sound. Buttons on the remote transmitter give you manual control should tracking adjustments be necessary.

### Auto Head Cleaner

Gently, automatically cleans the video heads each time a tape is inserted or removed to maintain optimum picture performance during playback.

### Rental Play

Get your money's worth from "well-used" rental tapes by improving the picture quality. Activate Rental Play, relax, and enjoy your favorite video with exceptional clarity and smooth, even detail.

## Convenience

### AC/DC Operation

Using supplied cords, this model operates on both ordinary household 120-volt current (AC) or direct current (DC) available through car, boat, or RV.

### Indefinite Repeat Play

When the VCP recognizes no recorded signal or reaches the end of a tape with the Repeat Play control activated, it automatically rewinds to the beginning and enters the play mode again. Repeat Play continues indefinitely until it is disabled by the operator. To disable Repeat Play, press the button a second time or change the operation mode.

### Rapid Start Mechanism

Quickly and effortlessly switches the tape mechanism from Stop to Play in only 1 second, instead of the approximately 5 1/4 seconds of older models.

### Rear Panel Audio/Video Output Jacks

Connect your VCP to the direct audio and video inputs of a television receiver or monitor equipped with input jacks, for better picture and sound quality during tape playback.

### Dew Sensor

Automatically senses any condensation on the video head and inhibits all functions until the moisture dissipates, protecting the player and your videotape library from accidental damage. Condensation often occurs in humid climates or in colder climates when a portable unit is moved from a car, boat, or RV to an indoor environment where the air is warmer than the previous location. If moisture is detected when power is applied, "Dew Protection—Please Wait" flashes onscreen in bold, red letters alerting you to potential danger.

## Special Effects

### 5x Forward/Reverse Search

Search in forward or reverse mode at 5 times normal playing speed in SLP. The search feature provides continuous forward or reverse search with a single touch of the control. A second touch stops the search operation and returns the unit to the Play mode.

### Remote Control (Remote # N9239UD)

#### Multifunction Infrared Remote

Controls all operating features and functions of this VCP with arm-chair convenience—including all special features, random channel access, and channel scan up/down providing an LED virtual "handshake" for confirmation.

## Full Auto-Feature Package

- Power On
- Digital Auto Tracking
- Auto Play
- Auto Repeat
- Auto Rewind
- Auto Eject
- Auto Power Off
