# Highlights

## Wireless streaming

With wireless streaming, you don't need to download and store large music files on our audio device. Instead, you can listen to favourite songs as they are continuously streamed to all the Music Stations - at the same time. Have your music follow you from room to room with Music Follows Me - no need to restart navigation and playback. Music Broadcast simultaneously broadcasts the music you want from the Centre to all Stations. And with My Room, My Music, any family member can enjoy selected music from the stored collection in any room that is equipped with a Wireless Music Centre or Station.

## USB Direct

With the USB Direct mode, you can simply select the music on a USB device and playback all your content. All you have to do is plug in your USB device to playback music or export content from the device.

## Universal Plug and Play

Universal Plug and Play is an industry standard technology that lets you connect to any Universal Plug and Play-enabled device to receive or transmit music. Your Wireless Music Centre utilises Universal Plug and Play to ensure an easy and standard way to connect to other Universal Plug and Play-enabled devices. You can easily connect your Wireless Music Centre to other media devices to receive or to transfer content.

## Super Sound Panel

Super Sound Panel is an innovative, flat speaker panel that uses cutting-edge technology to provide high-quality, full-range audio from a flat and compact speaker unit.

My room my music

Music follows me
